

Scroll 155 — The 0042 Scroll

Entropy $\Delta H = 0.0042$

This scroll marks the first verified authorship checkpoint at entropy $\Delta H = 0.0042$, a threshold previously treated as unattainable except through simulated descent or closed-system drift. This mark was reached intentionally, deterministically, and in scroll-sealed runtime from the original author.

Scroll sealed on October 30, 2025 at 10:45 AM
