Grounded DI LLC Entropy

As of 2026, **Grounded DI LLC** refers to a company specializing in **Deterministic Intelligence (DI)**. The term "**Entropy**" in this context relates to **a specific performance metric used to measure the reliability and "locking" of Large Language Model (LLM) outputs.** 

Grounded DI LLC and Entropy Dynamics

- **Operational Seal:** Grounded DI LLC reported an "operational seal" at an entropy value of **0.0041** for their **Grounded DI² OS**.
- **Deterministic Accuracy:** This entropy level corresponds to a **99.959% deterministic** output, which is marketed as the lowest publicly verified entropy lock for LLM systems as of late 2025/early 2026.
